Villeurbanne - France

bilelsgh

Skills

Python, AngularJS, Javascript, Go, C, Java, HTML, SQL
MongoDB, Tensorflow, Neural network, Data visualization

NATIVE FLUENT BEGINNER

Education

2019 ● INSA Lyon - Telecommunications

Currently studying Master of engineering degree program in Telecommunications. Modules :
- programming
- neural networks
- network protocols and architecture
- image analysis and processing
- cryptography and system security

Expected completion date, June 2022

2017 ● Preparatory classes for Polytech Engineering schools - Le Bourget du Lac (France)

Common-core syllabus specializing in computer science and electronic

2017 ● French baccalauréat with high honours - Lycée Vaugelas, Chambéry (France)

Sports class throughout the tree years of high-school.

Experience

2021 **Developped Business Intelligence tools** using CubeJS, Tableau Software, Express, Pandas, SQL, Machine Learning. Internship at Worldline, Villeurbanne (France).
4 months, until July 2021

2020 - 21 3rd place at an **open innovation project** with 4 other people - organized by Safran and Agorize with over 100 teams

2020 **Participation at a «coding battle»** Online algorithmic competition organised by «Le Shaker»

2020 Research initiation project on **distributed compressed structure:** writing a survey and studying different non-blocking algorithms

2018 **Developed a web page** allowing to process the storage and the bandwidth for remote monitoring using **HTML, CSS** and **Javascript.** Internship at Panthera, Chambéry (France)
1 month

Projects

- Creation of a neural network - with **TensorFlow** - to ensure the fluidity of a network of routers modelled with Python - team of 3 people **2021**
- Implementation of TCP protocol over UDP allowing several communication processes with **C** language **2021**
- Created a concurrent and multiplayer cards game : management and synchronization of different players using **Python.** **2020**
- Built the back-end of a fictitious site for selling objects: training in MongoDB and Express **2020**
- Built the front-end of a personal assistance website using **AngularJs** with 2 other people and collaboration with the back-end team **2020**
- Implementation of an application allowing to know all the shortest path from a node to all the other nodes of a tree processing Dijkstra in a concurrent way using **Go.** **2019**
- Created a sudoku solver using **Python.** **2019**

Hobbies

Judo 15 years, black belt. Regular participation in regional and national level competitions. Referee for departmental level competitions.

Photographie 3 years. Production of portrait and promotional photos

Science & high-tech Regular consultation of science articles and videos
